June 10, 2005

Recap: SketchFest NYC - Opening Night - 6/9/05

Hypnagogia - 7PM

A central theme in Hypnagogia's performance was the struggle with and the acceptance of new technology. A lifeworn robot drinking gin alone while listening to his saddening answering machine messages or a revision of old recordings, society assimilates technology with all its marvels and its shortfalls. The actors interfaced with technology through art with comedy and wonderment. Hypnagogia's unique set owes more to the theatre of Bertolt Brecht or Edie Falco's Night Live.

Becky & Noelle - 8PM
